

Management Policy

on Quality, Environment, Health and Safety

Autoneum is committed to being the global market and technology leader in acoustic and thermal management solutions for vehicles.

A motivating culture serves Autoneum as a foundation to fulfill its principles over the long term:
Delight your customers – enjoy your work – fight for profits.

This shall be achieved through:

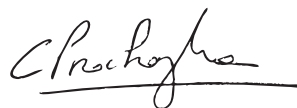

- Ensure excellence in quality, environment, health and safety (QEHS) and its implementation at the workplace
- Advance implementation of QEHS processes in all areas to prevent injury, illness and environmental impact
- Eliminate hazards and reduce risks in regard to business, people and the environment
- Continuous improvement of the business processes and management system
- Efficient use of all resources over the entire life cycle time of our products
- Focus on sustainable actions and environment protection within all business areas
- Transparent communication with all stakeholders
- Compliance with laws, provisions, regulations and internal guidelines and other applicable requirements
- Set-up of framework allowing our employees to live by our values

Autoneum continuously strives to improve the Company's performance, products and processes.
