Main levers for growth

Grow Asia to 20% of revenue

- China single largest automobile market worldwide
- Well-established footprint of Business Group Asia across the region
- Unexploited potential for new business in main market China

Innovate for new mobility

- Accelerating shift to electric vehicles
- As of 2025, most OEMs to build vehicle fleet around EV platform
- Potential to grow with both existing products and innovations targeted at electric vehicles

Advance sustainability

- New requirements and regulations, e.g. Paris Climate Agreement
- Increased sustainability targets and requirements from OEMs
- Continued focus on sustainable products and processes as a competitive factor

Agenda

SBTi

Autoneum committed to the
Science Based Targets initiative

CHF million	HY1 2021	HY1 2022	Change
Revenue	890.3	888.7	-1.7
EBITDA	105.4	67.5	-37.9
<i>in % of revenue (change in pp)</i>	11.8%	7.6%	-4.2
EBIT	44.7	6.4	-38.2
<i>in % of revenue (change in pp)</i>	5.0%	0.7%	-4.3
Net result	25.5	-12.8	-38.3
Investments in tangible assets	10.0	10.4	0.4
Free cash flow (FCF)	67.2	45.2	-22.0
Basic earnings per share (EPS) in CHF	4.35	-3.81	-8.16

Similar level year-on-year supported by inflation compensations

CHF million

EBIT impacted by inflation and volume decline in Europe and China

CHF million

Slightly positive EBIT but negative net result

CHF million	HY1 2021	HY1 2022	Change
Revenue	890.3	888.7	-1.7
EBITDA	105.4	67.5	-37.9
EBIT	44.7	6.4	-38.2
Financial result	-10.5	-10.5	-
Earnings before taxes	34.2	-4.1	-38.3
Income taxes	-8.7	-8.7	-
Net result	25.5	-12.8	-38.3
attributable to AUTN shareholders	20.2	-17.7	-37.9
attributable to non-controlling interests	5.3	4.9	-0.4
Basic earnings per share (EPS) in CHF	4.35	-3.81	-8.16

- Revenue in Swiss francs decreased by 0.2%
- Lower financing costs in line with lower average financing level, offset by negative currency and valuation effects
- Despite a negative pre-tax result, income taxes to be paid for profitable subsidiaries
- Net result attributable to AUTN shareholders decreased by CHF 37.9 million, resulting in negative EPS of CHF -3.81

Solid free cash flow generation in spite of reduced profitability

CHF million	HY1 2021	HY1 2022	Change
Cash flows from operating activities	76.5	54.6	-21.9
Cash flows used in investing activities	-9.4	-9.4	-
Free cash flow	67.2	45.2	-22.0
Cash flows used in financing activities	-269.1	-11.2	257.8
Change in cash and cash equivalents	-197.7	33.8	231.6
Cash and cash equivalents at June 30	124.2	137.5	13.3

- Drop in FCF smaller than EBITDA decline of CHF 37.9 million
- Investments in tangible assets kept on a low level thanks to the utilization of past investments
- Pro memoria: Excess cash used for repayment of credit lines in the first half-year 2021

Net debt reduced further and stable equity ratio

CHF million	31.12.2021	30.06.2022	Change
Total assets	1502.0	1532.9	30.9
Non-current assets (excl. leased assets)	681.2	652.1	-29.1
Leased assets	260.9	251.9	-9.0
Net working capital	107.2	110.1	2.9
Cash and cash equivalents	103.7	137.5	33.8
Borrowings (excl. lease liabilities)	355.1	371.4	16.3
Lease liabilities	282.3	275.5	-6.8
Net debt (excl. lease liabilities)	251.4	233.9	-17.5
Shareholders' equity	451.2	442.1	-9.1
<i>in % of total assets (change in pp)</i>	30.0%	28.8%	-1.2

- Increase in total assets by around 2.0% supported of positive currency translation and hyperinflation effects of CHF 15.5 million
- Net working capital increased by only CHF 2.9 million despite the impact of stop-and-go production of customers
- After payment of dividends and lease liabilities, the remainder of the generated FCF was mainly used to reduce net debt by CHF 17.5 million
- Shareholders' equity decreased by CHF 9.1 million, resulting in a decline in the equity ratio of 1.2 percentage points to 28.8%

Agenda

1. About Autoneum
2. Results Half-Year 2022
3. Outlook
4. Technology trends
5. Corporate Responsibility

Volumes in HY2 2022 expected to be higher than in HY1 2022

- Full-year 2022 automotive production expected to rise by 4.7% to 80.8 million vehicles* compared to 2021, driven by second half of the year
- Production volumes expected to be 8.8% higher in HY2 2022 than in HY1 2022, and clearly higher than in HY2 2021
- By 2024, production volumes are forecasted to exceed 2019 volumes

million units

Revenue with BEVs to outperform global BEV market share

Global EV powertrain forecast*

2022 – 2028 (million units)

- **Current order intake with BEVs** already indicates a significant increase **by 2025**, with interior business being the major driver
- **Revenue with traditional Autoneum product portfolio** into BEVs growing **above BEV market share** as of 2023

*Source: IHS Light Vehicle Powertrain Forecast as of June 2022

Outlook 2022

Market

According to global market forecasts*, automobile production will pick up again in the second half of the year with growth of 8.8% compared with the first half-year 2022. For full-year 2022, global automobile production is projected to reach 80.8 million units, which is equivalent to a 4.7% increase on 2021.

Revenue

Revenue in the second half of the year is expected to be accordingly higher than in first half of 2022. Autoneum's revenue development for the full year is expected to be in line with the market.

Profitability and free cash flow

Based on the market development and supported by ongoing customer negotiations with a view to fair sharing of increases on energy, material and transport costs, Autoneum expects an EBIT margin of 2.0% to 3.0% for the full year 2022. Free cash flow is expected to be in the mid to high double-digit million range for the full year.

Light vehicle production by region

Global growth until 2025 mainly driven by China

Agenda

1. About Autoneum
2. Results Half-Year 2022
3. Outlook
4. Technology trends
5. Corporate Responsibility

Expected production volumes by drive type

- Accelerating shift to electric vehicles: By 2029, more than 35% of light vehicles produced globally are expected to be BEVs.
- Revenue with traditional Autoneum product portfolio into BEVs expected to grow above electric vehicle market share as of 2023.
- In HY 2022, more than 62 electric models worldwide were equipped with Autoneum components.
- In HY 2022, more than half of Autoneum's new awards were for pure electric vehicles.

Product innovations for electric vehicles

Development roadmap

Key takeaways

Electrification and sustainability are the key driving forces for future development.

Autoneum has developed and successfully launched five new products for BEVs applying and optimizing existing technologies for new requirements of electric vehicles.

New products include vehicle components such as frunks and e-motor encapsulations as well as specific battery housing components.

Lightweight and thermal management remain key drivers for new products for future BEV generations.

Process

Alternative Backcoating (ABC)

Application

- Needlepunch carpets

Advantages

- Use of thermoplastic adhesive instead of latex
- Improved recyclability at the end of the product life cycle
- Manufacturing process requires no water and less energy than the production of latex-based backcoatings

Technology

Flexi-Loft

Application

- Inner dashes
- Carpets

Advantages

- Unique fiber blend increases sustainability geometrical adaptability of components
- Felt-based material made from at least 50% recycled cotton fibers
- Lightweight, versatile and sound-absorbing

Technology Relive-1

Application

- Tufted carpets

Advantages

- “Autoneum Pure.” label for outstanding environmental friendliness
- Carpet yarns consist of up to 97% recycled PET
- High abrasion resistance and easy to clean

Technology Ultra-Silent

Application

- Frunk for electric vehicles
- Underbody systems

Advantages

- 50% lighter than plastic solutions common today
- Made from up to 70% recycled material
- Sound-absorbing textile material composition

50 years of cutting-edge technology

Measurement systems

autoneum

Autoneum is leading provider of measurement systems for vehicle acoustics

Innovative systems for measuring NVH (noise, vibration, harshness) behavior

Global industry standard

Used by automotive manufacturers, suppliers and laboratories

Software for component optimization

Simulation

Acoustic Garage – first online configurator around noise protection in vehicles (acoustics.autoneum.com)

Programs developed in-house for optimizing vehicle NVH behavior

“Best in class” solutions for vehicle development and production

Tailored for vehicle manufacturers' individual requirements

Agenda

1. About Autoneum
2. Results Half-Year 2022
3. Outlook
4. Technology trends
5. Corporate Responsibility

Sustainability in focus

Challenges and opportunities

Growing requirements from society, market and customers:

- Global fight against climate change and environmental pollution
- Paris Climate Agreement targets
- Reduction of Scope 1, 2 and 3 emissions
- OEM sustainability targets to drive supplier actions:
 - Lower CO₂ emissions
 - Circular production processes
 - Reduce waste, water and energy consumption

Advance Sustainability Strategy 2025

Key achievements in 2021

With its **Advance Sustainability Strategy 2025**, Autoneum has defined an ambitious set of environmental, social and ethical targets.

67 eco-efficiency projects:

Waste reduction

Energy consumption

Water usage

Launch of **two innovations** with a high sustainability performance

91

community projects
implemented globally

Ambitious targets in four dimensions

- Health & safety
- Fair working conditions
- Employee development
- Employee well-being
- Diversity & inclusion

Fair and
attractive
workplace

Sustainable
products and
production
processes

- Sustainable innovations
- Eco-efficient processes
- Waste reduction & recycling
- Energy management
- Emission reduction

- Ethical business conduct
- Compliance
- Fair competition
- Corruption prevention
- Community engagement

Good
corporate
citizenship

Responsible
supply chain
management

- Human rights
- Labor rights
- Environmental protection
- Business ethics
- Material compliance

Vision 2027: Sustainable products & production processes

Continuous focus on

Sustainable innovations

Material waste reduction & increase of recycling capacities

Reduction of emissions, energy and water consumption

Building a culture of environmental sustainability

Impact and key levers for improvement CO₂ emissions, waste and water

Sources of CO₂ emissions according to Greenhouse Gas Protocol

Scope 1 ~ 5%
Direct emissions from company-owned and controlled resources
Levers: steam loss, thermal insulation

Scope 2 ~ 10%
Indirect emissions from the generation of energy purchased from a utility provider
Levers: compressed air, lighting, renewable energy

Scope 3 ~ 85%
Indirect emissions in the value chain of the reporting company (upstream and downstream)
Levers: supply chain, transport, waste

Revised environmental operational targets 2027

Reduce Scope 1 & 2 emissions by **20%**

Increase the share of renewable electricity to **25%**

Reduce Scope 3 emissions by **20%** for 2/3 of the total scope

Reduce total non-hazardous waste volume by **40%**

Reduce water consumption by **10%**

Sustainability label for products

Technologies with an excellent environmental performance throughout the entire product life cycle.

Partially or entirely made of recycled materials

Production cut-offs are reclaimed, processed and reused again

Significantly lighter than comparable standard components

Recyclable

Sustainability champions

Ultra-Silent

- Made of 100% PET with up to 70% recycled fibers
- 50% lighter than equivalent plastic parts
- Mono-material and fully recyclable
- Use: underbody systems and frunks

Relive-1

- Carpet yarns consisting of up to 97% recycled PET
- More robust and dirt-repellent than standard carpets
- PET cut-offs can be fully reclaimed and reused
- Use: tufted carpets

Prime-Light

- Made of more than 50% recycled cotton fibers
- Saves 7 kg of weight on a typical car
- Fully recyclable
- Use: inner dashes and floor insulators

Hybrid-Acoustics PET

- Made of 100% PET with up to 50% recycled fibers
- 40% lighter than alternative insulation products
- Mono-material and fully recyclable
- Use: e-motor encapsulations

Sustainability champions

Di-Light

- Made of up to 97% recycled PET
- 20% lighter than conventional needlepunch carpets
- Mono-material and fully recyclable
- Use: non-woven carpets

Mono-Liner

- Made of 100% PET with up to 70% recycled fibers
- Up to 50% lighter than corresponding plastic components
- Fully recyclable
- Use: wheelhouse outer liners

IFP-R2

- Contains up to 80% recycled fibers depending on composition
- Significant weight saving compared to conventional solutions
- Fully recyclable
- Use: inner dashes and floor insulators
